PROFESSIONAL SUMMARY

React Native Developer with 6+ years of experience building scalable and high-performance mobile applications for iOS and Android. Proficient in React Native, Next.js, Node.js, TypeScript, PostgreSQL, and SQL, with expertise in offline-first architectures using WatermelonDB, REST API development, AWS deployments, and CI/CD automation. Experienced in application security (VAPT), performance optimization, and delivering enterprise-grade solutions from development to production in Agile environments.

SKILLS

Mobile Development: React Native, JavaScript (ES6+), TypeScript
Frontend: React.js, HTML5, CSS3, SCSS, Bootstrap, Next.js
Backend: Node.js, MongoDB, Python (Flask), REST APIs
Databases: PostgreSQL, SQL, WatermelonDB, Offline-First Architecture
Tools & DevOps: AWS, Git, CI/CD, VPS Deployment, JIRA, Storybook, Agile/Scrum
Security: VAPT Remediation, SSL Pinning, Secure Authentication
Testing: Jest, Unit Testing
AI Development Tools: Cursor.Ai, Claude Code, Copilot, Codex, OpenAI.
AI & Automation: Generative AI, LLM Integration, AI-Powered Development, AI Data Analysis, Intelligent Report Analysis, AI Workflow Automation, AI Content Generation, Prompt Engineering, AI API Integration, Business Process Automation

WORK EXPERIENCE

Full Stack Developer **Nov 2025 - Present**
Greenfield Marine Technologies - UAE Abudhabi
Marine technology company focused on vessel management, audits, and compliance solutions.

- Developed and maintained enterprise-grade mobile and web applications including ShipArc.ai and Voyage.IQ using React Native, Next.js, Node.js, and PostgreSQL.
- Designed and implemented scalable REST APIs and backend services to support vessel management, audit, training, reporting, and compliance workflows.
- Built offline-first functionality with local data storage and synchronization mechanisms, ensuring uninterrupted operations in low-connectivity environments.
- Developed and enhanced core modules including Audit Management, HSE, Training, Quiz, Rewards, Reporting, Engine Management, and Deck Management.
- Implemented Over-the-Air (OTA) update solutions for Android and iOS, enabling seamless application deployments without app store releases.
- Optimized application performance, state management, and data synchronization processes to improve user experience and system reliability.
- Collaborated with cross-functional teams, stakeholders, and clients to gather requirements, design solutions, and deliver new features.
- Developed AI-powered analysis workflows for crew reports, enabling automated analysis of operational reports and identification of critical findings, risks, and actionable insights.
- Implemented AI-driven critical analysis of validated reports to identify important operational patterns and generate structured insights for management and compliance teams.

- Performed bug fixing, security enhancements, and VAPT remediation activities to improve application security and compliance.
- Managed CI/CD workflows, production deployments, and release processes across mobile and web platforms.
- Participated in React Native version upgrades, dependency modernization, and application architecture improvements to ensure long-term maintainability.

Senior Software Engineer / Chief Technical Officer **Sep 2024 - Oct 2025**
Envinto LLP
Tech company empowering businesses across industries through scalable web, mobile, and digital solutions.

- Led multiple end-to-end mobile and web projects using React Native, React.js, and Node.js for clients in social, ERP, and e-commerce sectors.
- Social Media App: Designed and built a cross-platform platform inspired by Instagram and Twitter with interactive features (posts, likes, comments).
- ERP App: Delivered a complete mobile ERP solution for service providers, integrating job assignment, notifications, inventory, and invoicing.
- E-commerce Platforms: Developed boutique and customizable product stores using React.js, Node.js, and MongoDB, deploying via VPS for scalability.
- Managed UI/UX optimization, API integration, and server deployment for multiple client projects.
- Supervised small dev teams and contributed to architecture design decisions.

Associate Software Engineer
Fivsys **Jul 2024 - Sep 2024**

- Developed a PG registration mobile app using React Native and Node.js for property owners in Bengaluru.
- Implemented backend modules for tenant registration, data storage, and real-time updates.
- Focused on UI/UX consistency and data validation to ensure seamless user experience.

Software Engineer Trainee
Seidor Opentrends **Mar 2023 - Mar 2024**

- Contributed to the Kuady Wallet App, supporting cross-border online payments for Spain, Colombia, and Mexico.
- Implemented features for virtual cards, money transfers, and transaction tracking using React Native.
- Performed unit testing (Jest) and integrated CI/CD pipelines using Bitbucket.
- Collaborated with the QA team to deliver bug-free and optimized releases for Android & iOS.

Freelance Mobile Application Developer
Freelance Project **Apr 2024 - Jun 2024**

- Developed a PG registration mobile app using React Native and Node.js for property owners in Bengaluru.
- Implemented backend modules for tenant registration, data storage, and real-time updates.
- Focused on UI/UX consistency and data validation to ensure seamless user experience.

EDUCATION

B . E Computer Science and Engineering **Aug 2018 - Jul 2022**
ANNA UNIVERSITY - Dhanalakshmi srinivasan college of engineering, Coimbatore

CGPA : 7.68
